according to william ury it takes two sides to fight but a third to stop distilling the lessons of two decades  
of experience in family struggles labor strikes and wars he presents a bold new strategy for stopping  
fights he also describes ten practical roles as managers teachers parents and citizens that each of us can  
play every day to prevent destructive conflict fighting isn t an inevitable part of human nature ury  
explains drawing on his training as an anthropologist and his work among primitive tribes and modern  
corporations we have a powerful alternative the third side which can transform our daily battles into  
creative conflict and cooperation at home at work and in the world

with intense pain also comes shocking realization as once again four average teenagers vanessa  
alexandria dylan and eric are forcefully kidnapped from their lives and thrust into an alternate world  
where evil rushes at them from all directions they have no choice but to battle for their lives and protect  
each others with the help of various unforeseen alliances the clock races down upon the four as they  
battle against fate betrayal and treachery to save a crumbling kingdom and force justice upon those  
responsible for its destruction yet will it be twisted love shaky destinies or the ever looming fear of death  
that finally withholds the ultimate goal of returning to the lives they once knew only the revelation of  
truth will lead to victory

the third side of a coin is essentially the one that connects the other two sides the head and the tail this  
analogy is used throughout the book to emphasize the importance of mastery learning in any profession  
such as medicine law or engineering mastery learning is the essential outcome of uniting the two flat  
faces of a coin with the help of the third circular side in any profession the two flat faces of the coin are  
theory and practice and the third side is the testing the author gives examples from his more than fifty  
years of experience in engineering practice and engineering teaching to prove that mastery learning is  
essential in the very rapidly changing pace of technology today any curriculum that ignores mastery  
learning is bound to produce obsolete engineers
